

## EVERYTHING IN ONE APP

Transportation companies are going mobile. With the most comprehensive features and the industry's best support, Transflo Mobile will get you there too.

I highly recommend Transflo Mobile.... It's widely accepted by drivers."

- Pat Wheeley, Manager of Document Center Processing, J.B. Hunt

Going mobile is quick and easy with Transflo Mobile.

### How it works

Developed specifically for commercial drivers, the Transflo mobile app is easy to use and allows drivers to manage all of their work from one tool.

From any place at any time, drivers can quickly:

- ✓ Manage loads
- ✓ Scan documents
- ✓ Preview mobile payments
- ✓ Send and receive notifications
- ✓ Pinpoint trailer locations
- ✓ Receive weigh station bypasses
- ✓ Log HOS and DVIR
- ✓ View approved routing
- ✓ Reserve parking spots
- ✓ Access payroll and settlements
- ✓ Capture digital signatures
- ✓ See two-way messages
- ✓ Utilize Navigation
- ✓ And much more!

With Transflo Mobile, drivers can use their own device. Once they download the app and access the features you've configured for your fleet, they can send and receive information about their loads. The app enhances the quality of scanned document images while compressing their size, ensuring that minimal mobile plan data is used. You receive high-quality digital documents, and drivers avoid messy paperwork. It's the easiest way to improve your business and help drivers be productive.

**Insights.** Instant visibility to operational data, documents, and signatures.

**Efficiency.** Configurable load workflows and two-way communications throughout your fleet.

**Results.** Shorter billing cycles and improved productivity for you and your drivers.

## How you benefit

With benefits for both carriers and drivers, Transflo Mobile improves business processes and supports drivers. The feature-rich app is designed for your enterprise, is configurable to your needs, and can integrate with your systems and TMS partners. It's also connected to other Transflo document management tools, which allows you to easily capture and manage information from multiple sources. Best of all, the technology is affordable for fleets of all sizes.

- 1,000,000+ commercial drivers registered
- 1,000,000+ communications sent weekly
- Up to 200,000 loads tendered each week

## About Transflo

Transflo® is the leading mobile, telematics, and business process automation software for the transportation industry. Provided by Pegasus TransTech, the Transflo portfolio digitizes over 500 million documents each year, representing nearly \$54 billion in freight bills. It also delivers real-time communications to thousands of fleets, brokers, and commercial vehicle drivers. Organizations throughout the company's client and partner network look to Transflo to increase efficiency, improve cash flow, and reduce costs.
